

OLYMPUS®

DR SERIES

Meet the **rock star** of dictation microphones.

## PERFORMANCE-WORTHY SOUND IN A DICTATION MIC. ROCK ON.

The Olympus DR Series perfectly combines technology and handling to help boost your efficiency even more. The ergonomic design ensures excellent operability, and the intuitively placed slider allows for one-handed access to the most commonly used functions. With available device configuration software and a Software Development Kit (SDK) for IT administrators and systems integrators, direct recording to your PC or Mac has never been easier.

### CUSTOMIZABLE PROGRAMMABLE BUTTONS.

Five programmable buttons and their respective functions can be customized to suit particular program settings for a variety of purposes, recording conditions and user environments.

### HIGH SENSITIVITY MICROPHONE.

The low-noise directional microphone blocks unwanted background noises, guaranteeing ultra-clear dictation recordings. Great for use with speech recognition software. The microphone sensitivity can be set at +6 or +18 dB, ideal for the busy office setting.

### PROGRAMMABLE USER ID.

Register an ID directly in the device and automatically have it used as part of the file naming convention for all created dictations.
